HEARING RESEARCH

Contents of Volume 78

No. 1

L.W. Henselman, D. Henderson, M. Subramaniam and V. Sallustio *(USA)*
The effect of 'conditioning' exposures on hearing loss from impulse noise 1

C.A. Miller, P.J. Abbas and B.K. Robinson *(USA)*
The use of long-duration current pulses to assess nerve survival 11

G. Cortopassi and T. Hutchin *(USA)*
A molecular and cellular hypothesis for aminoglycoside-induced deafness 27

A.Ya. Supin, V.V. Popov, O.N. Milekhina and M.B. Tarakanov *(Russia)*
Frequency resolving power measured by rippled noise 31

C. Mizuno, J.-L. Schwartz and Y. Cazals *(France)*
Periodicity of long-term context can influence gap detection 41

O. Gleich *(FRG)*
The distribution of *N*-acetylgalactosamine in the cochlear nucleus of the gerbil revealed by lectin binding with soybean agglutinin 49

I. Kitano, K. Doi, N. Mori, M. Umemoto, M. Sakagami, K. Fukazawa and T. Matsunaga *(Japan)*
Failure of forskolin to elevate the endocochlear potential in kanamycin-poisoned animals 58

B.A. Schulte and K.P. Steel *(USA, UK)*
Expression of α and β subunit isoforms of Na,K-ATPase in the mouse inner ear and changes with mutations at the W^v or Sl^d loci 65

D.Z.Z. He, B.N. Evans and P. Dallos *(USA)*
First appearance and development of electromotility in neonatal gerbil outer hair cells 77

J.-P. Vasama, J.P. Mäkelä, L. Parkkonen and R. Hari *(Finland)*
Auditory cortical responses in humans with congenital unilateral conductive hearing loss 91

M. Braun *(FRG)*
Tuned hair cells for hearing, but tuned basilar membrane for overload protection: Evidence from dolphins, bats, and desert rodents 98

No. 2

S.L. McFadden and J.F. Willott *(USA)*
Responses of inferior colliculus neurons in C57BL/6J mice with and without sensorineural hearing loss: Effects of changing the azimuthal location of an unmasked pure-tone stimulus 115

S.L. McFadden and J.F. Willott *(USA)*
Responses of inferior colliculus neurons in C57BL/6J mice with and without sensorineural hearing loss: Effects of changing the azimuthal location of a continuous noise masker on responses to contralateral tones 132

A. Schrott-Fischer, G. Egg, W.-J. Kong, N. Renard and M. Eybalin *(Austria, France)*
Immunocytochemical detection of choline acetyltransferase in the human organ of Corti 149

J. Syka, N. Rybalko and J. Popelář *(Czech Republic)*
Enhancement of the auditory cortex evoked responses in awake guinea pigs after noise exposure 158

C.-y. Wu and D.R. Stapells *(USA)*
Pure-tone masking profiles for human auditory brainstem and middle latency responses to 500-Hz tones 169

H. Furuta, N. Mori, C. Sato, H. Hoshikawa, S.-i. Sakai, S. Iwakura and K. Doi *(Japan)*
Mineralocorticoid type I receptor in the rat cochlea: mRNA identification by polymerase chain reaction (PCR) and in situ hybridization 175

S.G. Kujawa, M. Fallon and R.P. Bobbin *(USA)*
ATP antagonists cibacron blue, basilen blue and suramin alter sound-evoked responses of the cochlea and auditory nerve 181

L.D. Fechter and Y. Liu *(USA)*
Trimethyltin disrupts N_1 sensitivity, but has limited effects on the summating potential and cochlear microphonic 189

B.E. Pfingst, L.A. Holloway, N. Poopat, A.R. Subramanya, M.F. Warren and T.A. Zwolan *(USA)*
Effects of stimulus level on nonspectral frequency discrimination by human subjects 197

S. Uppenkamp and B. Kollmeier *(Germany)*
Narrowband stimulation and synchronization of otoacoustic emissions 210

N.P. Cooper and G.K. Yates *(Australia)*
Nonlinear input-output functions derived from the responses of guinea-pig cochlear nerve fibres: Variations with characteristic frequency 221

H.-S. Li, A.S. Niedzielski, K.W. Beisel, H. Hiel, R.J. Wenthold and B.J. Morley *(USA)*
Identification of a glutamate/aspartate transporter in the rat cochlea 235

J.-M. Huang, C.I. Berlin, J.K. Cullen, Jr. and A.R. Wickremasinghe *(USA)*
Development of contralateral suppression of the VIIIth nerve compound action potential (CAP) in the Mongolian gerbil 243

L. McEvoy, J.P. Mäkelä, M. Hämäläinen and R. Hari *(Finland)*
Effect of interaural time differences on middle-latency and late auditory evoked magnetic fields 249
